Mitad : fine 22. 1860.

Dear Sir. I have to acknowledge the pecipt of your letter of the 20 th inst. The idea you have precised about our assays, is no doubt owing to the change of standard, which was made 24 years ago. Before that we assayed to the standard of 22 lasts," but from that time to this our standard is Princestenthos; which is about 21' carato, a term which is not used her anymore. But it is no matter what the standard is, whether all gold or half goed; you get tack all the gold you bring, deducting only to of on per cent for comage, and the changes for parting trafining, where there operations are newson, to fupore the bullion for Cominge. Im Hol Dec Treveun Enclosing Communication for them Executencies the Ambassadors from Japan olso, Copies of Calificati of Ussay of Coms of Supan & M. States and generally in Water to the hothe of the Envoys Jun 20. 1860 Speciae Feli Imbassy from Jupan

Communication of the Director of the Mint to their Executions, the Ambassadors from the Empire of Lapan. Mit of the Unated States. Pholosophia June 20, 1860.

To their Excellencies the Anniaconand from the Empire of the para to the Unice and the of Almerica.

The undersigned. the similar of the Mint of the Muster States, bego have to refer your bearing to the last conforme have nother the offices of the Mit to regard both assery, and the consense; at which bis it was asked, whether it would not be proper that the office of the Breadury of Sapan should pate the poor good its in at quante, and the pron fred cotrary at \$2.60, m' exchanging for Mexican chollans, or for gold and vilour dollars of the Muin States, because that is an even decrimal figure, and the peak value is very news theuto; wet valuation to be temporary, until the bapanese forement shall have intitated putain reforms in its curring and

(2)

have now to repeat, in aciding as you required that we amoide it as to profession, and a consumit rate for consumeries.

to enter upon the engine of the process proposed, any factor them to make a few suggestations; think of not acceptable, may airpe, be laid.

It is prosente, that it more who just as stifficult in defenue as in any other country to introduce great and practical changes in the cureacy; aspecially in the smit of monies, with which the people one familiar. Now it is be bestomet, that which the old silver Azoto was rather too high with real that loke exchanged at the pate of three to thetex seen silve douer or their states greatours yet the change withoduced lately has brough, It down to a very neat adjustment to Heat pulmation; and torse new silver ingular

(3) lychange any now, with with of the down aboutioned; not to the may last francis, bet men enough. We thet this med out be alters; and the one have the busine that Here thebus are equal to one doctor. The west point is, to smake the good ingery and the great sections, to consepond to that basis according to the general platin of value between gred and vidoor; so that the Japane may undestand their part walth, and no longer he depended by the artifal exchanges of foreign merchant. And as you have already alloyed the silveribelie so as to make it mean the standard finings of noise-thats, (according to the pates in the shirted State. Mysico. and other Countries) we construct that the same standard should be used for the foca. Whether the permaining one but should be silver, or copper or both, as a mine metter with which we shall not conorn ourselves. The sunt point is to get the pright

quantity of goed. Then the Covary being four itzalus, should contain asmuch gold es 15 of our fred dollars. It showed contains 30.96 grains, 46, 2632 condarines, of fine gold; and being miner tentes fine, its actual cruzels showed be 34.4. graing or 5. 848 going Condarines This coin uned kromacy, but a love larger than our gold dollar; and you would do now to com also a price of ten covanyo, which would be remarto 13's docears. The gold it who would be quite too some for a coin, and seems, of no was, while you have a silveritzen.

massmal as some confusion might arise from containing the prame cotany for a coin so different mi value from that previously theme in more that mane it would be better it some to up to introduce into the currency a gold dollar to be rated as equal to three silver ityetus. Certificate of assays of Gold Coins of Lapan and the United States made in the presence of the Lapanere Embassy. Itlint of the Anited States, Philadelphia Inne 14, 1860. For the satisfaction of their Excellencies of The Supanere Embussy, the undersigned Director of the ellowh of the United States, Certifies to the results obtained by assay of fold coins of Japan and the Mulest States; made in their presence, by the proper Officers of the mint One Cobang Weighed 138 32 Stains; and the fold Extracted from it, weighed 79.32 One other cotany weighed 138-10 grains; and the goed extracted from it, weighed 7932 grams. one other colony Meighand 13932 frains; and the fold Extracted from it, Neighed 79:22 grams. So, on the average of there three, the covary contains 79 3/2 frams of fold which mates the proportion of fineness 5/2 Thousandths. This result agrees so well with

our report of assays made in our usual way (by tatting only a half framme, or about 7 3/4 gains) that we trust it will five additional Confidence to the bubarry, in our regular method of assay. A goed down of the United States Meighed 25-16 pains, and the fold Extracted from it neighed 237 gains, which gives as nearly as may be, to goo thousand the, our legal standard. Therefore for comparison, the covary contains 793 gains of fold, and The dona contain 237 gains of foed. But it will be more strictly account to Say that the probotion of focus in a covary is 572 thousandths, and in the dollar goo thousandths, and it is nearsay touch that the actual usight of the Jold dollar 25 to gravisty law, which is a more exact basis of calculation than the Singel price, which weighed 25 8125 and was therefore a little too heavy The silver being extracted, with the necessary allowance for absorption,

Showed almost 59 grains of Silver in each Colony and the copper was only 12 of one fram in each colony. To recapitulate the average compo-Sition of the covary is as follows in gramo: Sour 7912 Silver 54 Copper 012 138 24 All which is respectfully helmitted. Som Raph SADW Fort In wlatin lowaphin of Lapavere Enrys Inne 8,1860.

To their Excellencies the Ambassabors from the Empire of Japan, to the United States of America:

The undersigned, Duector de de hegs. leave to refer your Excellencies to the last Conference held with the officers of the Mint, in regard to the assays, and the currency, at which time it was asked, whether it mould not be proper that the Treasury Officers of the Treasury of Japan should rate the present gold itzelw at 90 cents, and the present new I gold cobang at \$3.60, in exchanging for Mexican dollars, or for gold and silver dollars of the U.S., because that is an even decimal figure, and the real value is very hear thereto; such valuation to be temporary, until the dapanese Toverment shall have instituted certain reforms in its currency have now to repeat the same, that we consider it altogether proper, and a consequent rate for calculation.

The officers of the Mint to not presume to enter whom the subject of the proposed reforms, any farther than to make

a few suggestions, which, if not acceptable, may Simply be laid aside. It is probable, that it nowed he just as difficult in Japan, as in any other country, to introduce great and radical changes in the currency especially in the unit of moneys, with which the people are familiar. Now it is to be observed, that while the old silver etzeln was rather too high in its real value, to be contidered exchanged at the nate of three to the Mexican or United States gold dollar, yet the change introduced lately has brought it down to to a very neat adjustment to that valuation, and three new silver itselves exchange very well, with either of the vollars above mentioned; not to the very last paction, but near enough. So that this need not be altered; and thus we have the basis, that three itzebus are equal to one dollar. The next est point is, to make the gold itzelu, and the gold cottang, to conespond to that basis, and according to the general relation of value between gold and silver; so that the Japanese may understand their real wealth, and no longer be defrauded by the artful exchanges of foreign murchants. and first, as you have already alloyed the

silver itzelu so as to make it near the standard fineness of nine tenths (according the rates in the United States, Mexico, and other countries) we suggest that the same standard should be used for the gold. and Whether the remaining one-tenth should be silver, or copper, or both, is a moror matter with which we shall not concern ourselves. The great point is to get the should being four itzebus, should contain as much gold as 1'3 of our gold dollars. It should contain 30.96 grains, or 5.2632 condarines, of fine gold; and being nine-tenths fine, its actual weight should be 34.4 grains, or 5.848 condarines. This coin would be small, but a little larger than our gold dollar; and you would do well to coin also a piece of ten cobangs, which would be equal to 13 3 dollars. The gold itzebre roued be quite too small for a coin, and Seems to be of no use, while you have a silver itselve as to the shape of the coins, it is very obrious, that a circular form mould greatly facilitate the mork at your mint. A round piece is always right when laid on the die, but a square or oval piece must be carefully adjusted; and this takes time and labor.
I cannot close this letter, without expressing the opinion of the officers of the minh

as to the accuracy of your arrays. If, as you state, the intention was to make the gold cobang consent of 573 parts gold and 427 parts silver, then the fact that it actually contains 572 parts, shows a close approximation, and it shows that your assayen understand their business. At this day, the coins of France are one thousand the it. Hers than they are intended to be; and all the doubloons, of north and South america, are 5 to 10 thousand this, and even more, below their professed fineness. Your new silver coin should than it is the the about one per cent finer, according to the single price we assayed; but the assay of silver, waln't it is done by the furnace, can never be So exact as the gold. We therefore recommend the "humid group" for silver useful for your Mint officers to have a small piece of absolute fine gold, and fine silver, to compare mith their own, and I therefore beg you to accept what is enclosed, for that purpose. I have the freeh deshed

In these remarks we refer strictly to the new cobangs; because those which were coined a few years ago did not show the same accuracy.

elbint of the United States. Philadelphia Gune 1, 1860.

I have received your letter of the 30 thult? enclosing certain come furnished to the Department by the Enough from the Empire of Japan and desiring me to report the intrinsic value of each third according to the standard of the Mortes States.

In order to comply with your request twas necessary to have a part of the aris a resent which has been done by the Assayer of the Mint, and I now proceed to report the results obtained

Thereform: Silver. Two pieces were vint, one ord, the other new; the latter said to be "comed out of Mexican doctors, without change in fineness. Mexican doctors, without change in fineness.

The older piece weighs . 278 og. or 1332

grains and its finances is 985 parts pure in one
thomograph; value at our mint pate, 36.9 cents. It
is found also to contain him thousandthe of Sold,
which is a proportion large enough to be parted with
a profit; but being merely incidental; cannot be
retinated as affecting the value of the Silveright
It is only mentioned as an intresting fact, showin
that the parting process is not earned!

perfection as in this lountry and in Europe; while at the same time it is evident that the Japanese are skilfue in refining silver from the base metals. on my last statement of the fineness of freign con's, contained in your Report on the Thiswess, it will be seen that ever found the itzebe tobe as high as 991 thousandthe and the Weight being. 279 og. made a value of 37 cents. The new itzetu weight precisely the same as the old. The fineness is 890 thousandths; whereas, lote made of ellegican dollars, it showed be about 900, or 901; the difference being about one per cent. The value is 33 25 cents; and the prediction of traces from the old Azetu, 3.62 cents; very nearly temper lent Gold. The pieces sent were nine oval cotany and tusto pectangular itzetus. Of the colonys the average weight was . 259 og or 138/4 grains; somerely they showed a good degree of imitornity, although one percewas about 12 grains hight, and another a half grain heavy; the rest did not vary a quarter grain from the general average. The fineness of one piece was 57, thousandthe, and of another often - there the lower rate, for reasons hereafter given, the balue Ino, counting our mint charge of to per cent for comase; would be \$3.41. But there is in the com a large por portion of Silver; that is to say the thousand the are composed as founds: 571

The proportion of silver being so large, and iniformly so, it becomes necessary to late an account of it, in valuing the lobang; so that, after deducting The refreme of parting, (not of comiage,) the full bolice of the cotanges \$3.59. It is necessary here to state, that in February 1839 (less than 18 months ago) we assayed some Cotango, which were nearly received from Lapan, and found their value lobe \$4.44. The fuences being 568 thomsandthes. The fold Agebres were found proportionals or \$1.11. The peduction of weight and size in So short to the access state of paragraph of your letter fold etgetus, the average weight was . 0722 g., or precisely one fourth of the cobang; and each of the twelve pieces should a very elose adjustment. The finewess of one piece was 5% o thousand the and of unother precisely the same. The indications are, that this is about the standard intended, and therefore the calculation was made for the cobang as already stand. The ford is found the covany. Set down at 89 /4 cents, or one fourth of the covany. To recepitulate: the silver itget of the older comage is wath 36. 9 cents; and the gold ityether of order date \$1.11 .- The vilou itzetu of reant comage is unth 33.28 cents; and the goed itgethe 89. 25 cents. If the Azelus in the two metals exchange

at par, it shows how large is the disparity between their Ratio and ours. When the Sapanere Envoys make their contemplated visit to the Mint every department of the inspection, so that they many as far as practicable, uituess every manipulation in fold. Silver and nickels copper. They can also see the assay of their own como, som of which have been persened for that purpose. It will be necessary honever, to give us several hours of their Utthe peat though to be You faithful Senant, James Ross Smuden Dicelorofth Mis pu St. B. Linderman How Howell both. 9a. When trust funds are deposited in other banks are they placed therein as individual deposits in the name of the bank as trustee? If not, did you instruct bank?		
10. Does bank receive in the trust department deposits of current funds subject to check or the deposit of checks, drafts, etc., for collection of exchange purposes?		
11. Are all investments of trust funds authorized or approved by the directors or a committee of same especially designated for that purpose?		

- 12. Is opinion of competent counsel obtained and filed in all important matters pertaining to trusts, both individual and corporate?
- 13. Where trust instruments specify character of investments, are investments made in accordance with such provisions?
- 14. Where trust instruments expressly leave investments to discretion of bank or its officers or directors, in what manner are investment authorized or approved, and in what manner is such authority or approval recorded?
- 15. Where trust instruments neither specify nor expressly leave the character of investments to the bank, its officers, directors, etc., are investments confined to securities in which fiduciaries in the State may lawfully invest?
- 16. Where trusts are under court order, are investments made strictly in accordance with the terms thereof?
- 17. Where court has by general order left investments to discretion of bank, or if in such cases general discretion is permitted by the laws of the State, are investments confined to securities in which fiduciaries in the State may lawfully invest?
- 18. Have any trust funds been loaned to any officer, director, or employee of the bank?
- 19. Are trust funds invested in securities or concerns in which officers, directors, or employees are interested? If so, list in detail.

- 20. Has the trust department, in any case, purchased from the banking department any of its assets as investments for trust funds, or has the trust department sold to the banking department any trust assets? If so, give full information and details.
- 21. Give date when audit or examination of trust department books and securities was made by or for the directors?
- 22. Did you make a thorough examination of this department, auditing the trusts and verifying the securities?
- 23. List criticisms, if any.

Gold and Silver Gold and Delver vary in cheir value when com - faced with one another, first as Coffee and Iron, or any two other metals vary. Hery vary from century to century, from year to year, and ever, in slight deques, from month to mouth. No ediots of Tiences cary frevert dies variation. All dal remained for Governments to do, is to ascertain, from time to time, what value the frecious metals have in the market of the world, when confeared with one another, and regulate cheir coin accordingly. It has been said above deat Gold and Dilin vary en cheir value en relation to one another, first as deoffer and Inon vary, the variations are dre fame interind, but not in degree. The variation is the value of Gold and Dilver are small, when conferred with the variations in the value of other commodities. Therefore, if a Government once estab. listres its corrage ou concet opinicables, it will not be orecessary afterwards to make many changes elevier. In table It, will be found a statement of the variations so far as drey have been ascertained that have taken of lace in the value of Gold as confeared with Dilier in the last 2300 years.

A short history of courage in the United So. will show how few changes are orecessary when a correct finiciples are adopted. The Hot to establish the United States she

The Hot to establish the United States Abin was passed on the 2th of April 1992. It shat time the value of Gold confrand with silver, in the onathet of the world, was 15 to 1 — that is to say one ourse of Gold was worth as much as fifteen ounced of Selver. This determined what as mount of fried silver should be fout into each silver point, and what as mount of fried gold should be fout into each silver point,

The Act Servided that the Hollar should contain 341/4 grains of Some silver and 443/4 grains of alley, or 416 grains of standard silver, of which, in every chairs and sparts, 892 308 should be fine. The Healf Dollar, it was frevided should contain exactly one half the quantity of Some selver, and exactly one half the quantity of some

alloy contained in the whole bollar. The Quarter bollar, it was forwided, should contain exactly one half the quantity of frame silver, and exactly one half the quantity of ally contained in the Half bollar.

The Dine, or Ten bent fried, it was friended, should contain equally one tenth as much ofrence

selver and espacely one tent as much alloy as the Dollar. The Healf Dine, or Five deart Spice, it was spirided, should centain exactly one tralf as much freme silver, and exactly one half as much ally us the Since.) In like manner it was enacted, that the teagle, or Ten Hollan Gold Piece, should contain 244/2 grains of four gold and 22/2 grains of ally esi all 2000 granis of it and gold. That else Healf Eagle, or Five Sollar Gold Price, Should cortain equally one half as much from gold and exactly me half as much ally as the And deal de Quarter Cagle, or two dollar and a Stalf Spice, should contain equally one half as much feene gold and exactly one half as much allow as the Healf teagle. It was expressly forovided by law. Hat the propertional value of gold to silver in all coins which shall by law be current as money wishin ele United States shall be as fifteen to one according to quantity in weight of fewe gold or fevre silver; drat is to ear wary fifteen founds weight of Some silver shall be of equal value in all feapments wish one found weight of frene gold, and so in fraportion to any greater or less

quantities of the frecious metals." Do micely by this law was the skirt valuation made to confer wish the market value, that gold and silver Jeassed uncurrently for afewards of twenty years, Mr ever fereferred gold could get gold, and who. ever seresed silver could get Silver. About the year 1818, owing to a concurrence of caused, Gold began to rise in value in the market in comparison of selver; and it continued to rise till one eagle, esistead of being worth ten selver dollars, was worth ten silver dollars and a tralf or more. Then the gold ceased to be used as a currency! It was either hoarded or expented. After dies state of chings had lasted for terelve or more years, the lenguess opassed an not by which the sheist ratio was fixed at , le 'ag to 1; that is to say, one ource of ofsence gold was estimated a worth enfleer our reed, one grain and ight feart of a grain of freme selver; and being den, as marly as could

be ascertained, the market value of gold when compared with silver,

This act reduced both the weight and the finences of the American gold coin. It provided that the Eagle should contain 232 grains of pure gold and 21 grains of alloy, or 258 grains in all; thus diminishing the quantity of pure gold in the Eagle 151/2 grains, and increasing the alloy 31/2 grains In every thousand parts, there were to be 889 29 parts of pure gold, In the old eagle, in every one thousand parts 91623 were of pure gold

fractions an act was passed on the 18th y for 1837 thigh with the design of causing both the gold and silver coins to contain the like proportions of alloy- that is to say of causing each to contain in very ten parts, nine of pure metal and one of alloy,

This act preduced the weight of the dollar from 414 to 4124, grains; but the preduction was wholly in the alloy, dollar coined under the act of 1837 have in them the same quantity of pure silver as dollars cound under the act of 1792, namely 3714 grains; but the alloy is reduced from 4434 to 4742, grains

This act increased, in a very plight degre the Jinimp of American gold coins, Eagles coince under it should each contain 2321/5 grains of pure gold and 254/5 grains of alloy, They differ from the eagle coince under the act of 1834, only in containing one fifth of a grain more of pure gold and one figth of a grain left of Under this act the Mint patio of Gold to Bilver is 15,988+ to 1, In other words, an ounce of pure gold is regarded as worth sixteen ounces of pun silver - less five grains and 2 /43 paits of a grain, The acts of 1834 and 1837 restored gold to circulation Both gold and pilver coins were used in payments, For some fifteen or sixteen years the acts worked well. But owing to the large supplies of Gold from California and Australia, goldfell in the market in comparison with silver, or what is the pame thing, silver pose in comparison with gold. In consequence selver coins were hourded or exported, To meet this dispreselly, Congress, on the 1" of March 1849, passed an act to authorise the comage of Gold dollars each to contain one tenth as much from gold and one tenth as much allow as the eagle. These gold dollars

supplied, to some extent the place of the silver dollars that had been withdrawn from circulation, But only part of the difficulty was thus overcome. The Amall selver coins (a those of a left denomination than a doday" were withdrawn from circulation, because they were worth? more as bullion than they were worth as money, or because they were worth more in other countries than they were rated at in the United States This induced bongues to pass an act on the 21st of February 1853, to authorge the coinage of half dollars or fifty cent pieces the weighty which would be 192 grains instead of 201/4 grains as formerly, of quarter dollars the weight of which should be, 91 grains instead of 103/8 grains as farmerly, of deines the weight of which should be 38,4 grains, instead of 414 grains as formuly and of half dimes, the weight of which should be 19.2 grains instead of 20.1125 grains as furnerly. It was provided that these new coins should consist of nine parts of pure silver, and one part of allow, This was, in realety, nating the silver in these new coins at a little more than it was worth in the market, But practical inconvenience was quarded against by taking care that the supply of these small coins should not excuse the demand, and by declaring that they should be The dollars.

This act has been found to work well, as has also a a similar act passed by the British Bournest respecting its small silver coin

The act that provided for the issue y new silver coins provided also for the issue of Three Collar Golde prices each to weight 77.4 grains, of the fineness of nine tenths, These have not been found to be very usifull,

ast to authory the issue of pieces to be composed of three fourths silver and one fourth copper, to weigh twelve grain and three eights of a grain, to be of the worth of three cents each, but not to be a legal tender in payments exceeding. Thirty pents,

There are the only acts peopleting Gold and Bilen coinage that the Government of the United States has found necessary to pass since it has been in existence bears are issued called cents, Each of these weigh 72 grains, and consist of 63,3h grains of copper and 8.44 grains of mickle, Ten of these cents pass in the market as equal to admie, and five as equal to a half dime, but they are not a legal

tender,

The lelver Dollar was originally the must of value. The quantity of finde eiler in whas mever been dimmished, though the quantity of alloy has been reduced 3 /2 grays ie now the amir. The quantity of hire gold and, the quantity of alloy in it howe never been aftered. All the Soverment of Japanhas to do to deliver itself from its present embanasment is to adopt these principles in relation to comage, the excellency of which has been rested by experience, not only withe anched I hases but in many other lando In fixing the ratio of gold anaxilve in its come it must have reference to the value, of gold telver in the market of the morld The present ratio is about 16 to 1: that is to lay, one onnee of gold is north about as model. as ercheen om ces of lelver Therefore 16 crinces of these selver in the selver como of Japan would be regarded as worth about as much: as one omice of have gold in the gold come of Jakan. If the Jahanese Severnment choosesto rase the eiler in its small silver come as a little more than its market rate no evil will ensue proveded it does not issue this eman silver in too large quantities, and provided it makes them a legal tender for only small amounts, eary not deceding one colong. The best proportion of alloy is one tenth. This is the proportion not only in the united States but indrance and midnany other countrais

It would be well if the Papanese com mere of the same from as the buropean and huerian. that is circular and thick in this form there io less loss of gold and silver by metrin than when the com is oblong or thin and oral, It is much to be desired that thoughout the Emferre of Jakan the conis of the same denomination engula all be of one neight and one fineness. The tempory of the mised States is nearly seventy times as extensive as that of Jahan. But the W. S. Evernment has only one Moint A Branch Reink, and one Issay Office. Lofon from more being wanted is mobile be well is Ino or three of the Branch homes overedistensed mish the fatherese Government can take for it chooses and call that mit a cobang or by any other name it choose. But the grantity of fame gold once adopted as a mit ought hever to be changed. Oerhaps the comage of Japanece dollars, to be of the neight anative. new of M.S. gold dollar is not morthy the assertion of the Japanese soverment. Then it would be easy to determine the relative value of Jakanese and other coms. It would be will if the neight and fineness of each freed whisher of goed or of celver were stamped on its face. If the Japanese Everment should adopt a new and rectified eystem of comage it will be just and honest to Ruffer its foresent come to pass in the market for massere they are worth. Whatever may be the denomination of Comis issued, one timared gramia of fune gold mi jakanes como are north intrinsically

as much as one hundred grams of hure gold in knerican or other com neigher more nor less (and one hindred grame of hime silver in Japanese com are north mismiercally asmuch as one hundred grams of fine silver in knesican or other coin - neither more norless) bet it may be proper for the Jakanese Sovemment to give a preference to its com by declaring, that it only shall be a legal tender in payment. The gold and elver comage of Jahan once ad. justed on these principles, foreign come might be suffered to hass in the market for just as much as they are north as they do in the United States. The interference of Soverment would not then be necessary to enforce justice between man and man in the exchange of foreign and domestic come If one ownce gold is north as much in the marker as sixteen ownces of silver, no act of either the Japanece, the united States or any other Sormi ment, can make an ownce of gold worth fifteen or seventeen onces of silver. The laws of nature one stronger than the laws made by man. If silver be and gold exported. If gold be much overated gold will be imported and silver exported. The only deviation that can eafely be made from market value, is, as has already theen stared in small silver coins, and then it must be on the principles adopted by the British and the united States Governments. The utmost hamis are taken in the united states to have each comi of the exact neight and fineness prescribed by law. To effect this object, not only are the most Skiltull artists employed in the fabrication of the coin, but once every year the Orisident of the Undadra

deputes, a number of respectable gentlemento orsit the boint, and by hersonal inspection accertain, that the laws in respect to the veight and fineness of com are strictly can. wed observed. After a sovernment has for a long revies of years continued to make its com of one might and Ineness, such com will bring a little more than other cams in certain markets because people have confidence mis such was the cate wish the Spanish com, and such has been the case of bodey wish Moesercan com there has heen some rariasion in its neighband fineness, but not such as to distroy confidence int. Let the Japanese Government once get its gold and selver comage properly adjusted, and then let is thereafter abstain from mnicessary changes therein, and its gold and lilver como will commad the confidence, not only of its ornificable, but of all the commercial world! Im lo. Longe

United States Theasury Department June 1/1866 Value of Gold to Silver us stated by Gold. Sirefevol in his letter to the King of England Gold to Silver 1 to 113 In Jersia, according to Herodoter 1.ta 13 On Greece, at fame feered, In Greece, in the time of Hato, 11012 1to 10 In Greece, it is stated by Herrofolion at After the Solunder of gold from the temple of Apollo, according to Memander, it was 16,10 In the reign of Alexander the Great it was 1t110 In Kome, according to Hing the elder 1to1428 In scome, after she tribute from she totolians 1to 10 The Solunder of gold from the Gauls by Julius Caesar reduced the proportions to story /2 In the reign of Claudius Jucitus, states it at 1612/2 Until the reign of Alexander Severes it continued Horzh In the reign of Constantine the Great 1600/2 The disorders, in the Roman Empire under Arcadius and Henvius raised it to 14,142 From which it appears that gold unless when defressed by sudden and unusual occurrences or enhanced by a dread of feablic insecurity. may be stated to have been for aparands of siene hundred years in the sprofention of 1 to 10.

A. M. SOLOMON. 2 Broadway. MERCANTILE BUSINESS PAPER BOUGHT, SOLD AND JAMES WILLIAMSON & CO.,

MEDALS OF WASHINGTON.—The distinguished director of the Mint at Philadelphia, Col. J. Ross Snowden, has been for some time past engaged in making a collection of coins and medals relating to the Father of the Country, which, as now arranged, is one of the most interesting monuments of the great patriot that could possibly be devised. Commencing with the earliest pieces of copper and silver, and continuing down from year to year, this collection shows that probably no man ever lived whose name and head were so frequently used on coins and medals, as Washington's. He was thus honored in England and France, as well as in America, and even within the past year many fine medalets have appeared with his bust on them.

The labor of making such a collection is manifest to any one. The earlier specimens are very rare in fine condition, and as we have frequently remarked before, the condition of a coin or medal will make a difference of three or four hundred per cent. in its value. But the earlier Washington coins, even in ordinary condition, are so rare, that a cent of 1791 is worth from \$5 to \$7, and one of 1792 from \$10 to \$20, while the rare variety of 1792, (a classic bust without clothing and the word one cent on the reverse,) would bring from \$50 to \$75, in almost any condition.

In the face of these exorbitant and ridiculous prices, Col. Snowden has laboriously finished his Washington cabinet, and also a duplicate set for Mount Vernon. The work demands more notice from the public, and a more general expression of thanks to the Director, than he has hitherto received.

Our attention is specially directed to it now, by a new medal which has been issued to commemorate the inauguration of the Cabinet at the Miat about two months ago.

This medal, the work of Mr. Paquet, is one of the finest specimens, perhaps the finest specimen, of American workmanship in medal-cutting that has been produced. The obverse shows a fine head of Washington, from the Hondon bust, the reverse exhibiting the new cabinet as arranged in the Mint at Philadelphia. The medal, as a whole, is exceedingly rich and elegant, reflecting great credit on the skill of Mr. Paquet, and on the taste and public spirit of Col. Snowden.

with counterfeits of gold and silver coin, and unless something is done to arrest the growing evil, the rygues will soon have it all their own way. Formerly a pair of scales and a bottle of nitric acid were all that was necessary to enable any receiver of money to detect the bogus coin, while an expert would separate the genuine from the counterfeit by the very touch and ring of the piece. Science and skill have changed all that; and now the experts are themselves at fault, while the common people are altogether at the mercy of the manufacturers of bogus coin. Up to a recent period the most dangerous fraud in circulation was made from a genuine die, fitted to strike quarter eagles, which was stolen from the mint at New Orleans. It bore the date of 1854, if we remamber rightly; and the pieces were made of composition metal handsomely plated, and coined in this atolen die. That was followed by the practice of splitting the gold dollar, taking out about sixty cents of its value, and soldering the shell together again. Then came the sawing into the edge of a piece, generally a half or quarter eagle, cutting two-thirds of the way through, and afterward filling up the coin, re-milling and gilding the edge. The latest and most skillful of these frauds is perpetrated, as far as detected, chiefly with the eagle. The piece is split into three parts, or at least the two outside shells containing the impression are separated from the centre. The latter is forfeited to the operator, and its place supplied by a filling of platina to which the outsides are fastened, the edges being re-milled and handsomely plated. This is so well done, that very few experts, outside of the twe accomplished testers of coin employed at the office of the Assistant Treasurer, and dever the cheat. The ten dollar piece under this management loses about \$5,50 of its gold, and remains equally good for general circulation. The fact that this is done at all, and the operation continued, is proof that it is carried on upon a large scale; for the exquisi

five thousand.

The counterfeit and fraudulent silver coins are also increasing. The greasy lead or soft composition quarter-dollars any one may detect; and a portion of the bad half-dollars are of the same stamp. But more recently a composition-piece has been uttered, which rings well, does not feel smooth to the touch, and can only be detected by careful testing. Its exact ingrediente are unknown, but the weight is evidently made up by a percentage of platina.

The increased abundance of the last-named metal has added very much to the facility with which these operations are cenducted. Formerly, if a piece offered as

cantage of platina.

The increased abundance of the last-named metal has added very much to the facility with which these operations are conducted. Formerly, if a piece offered as gold was of full weight, with no increase of size, the fair inference was that it must be genuine. Platina first time into use about the middle of the last century, being found in considerable quantities in South America, and since it has also been discovered in Russia and other parts of the world. In color it nearly resembles zinc, but it is heavier than gold, its specific gravity being 21.5 while gold is only 19.3. To facilitate the understanding of this subject, we may remark that in addition to these two metals, the others usually employed in these coinage operations are—mercury which weighs 13.5, lend 11.3, silver 10.5, copper 9, and zinc about 7; that is, the bulk of the metal displaces that number of times of its own weight of water. It is easy to see that as platina is worth so much less than gold, while its specific gravity is greater, it is certain to be employed in all successful frauds, where the weight is essential. In counterfeits of silver, it is sometimes added in small quantities to give both weight and consistency.

Since these new frauds are so difficult of detection

Since these new frauds are so difficult of detection when once the coin is in circulation, it follows that the only successful method of dealing with these manufacturers is to discover the the establishment whence they are first issued, and to take possession of the implements employed in their preduction. This is all the easier from the necessities of the case, as such elaborate work cannot be done in a corner. To make it worth while for experienced detectives to move in the matter, they must have a greater stimulus to exertion than the mere hope of becoming public benefactors. Formerly, the several District Attorneys at the principal commercial centres were authorized to offer rewards for the detection of counterfeiters, but the practice has fallen into disuse. It is the work of weeks to follow the most skillful utterers of bogus coin back to the establishment where the artist has his home, as not unfrequently the coins pass through several hands before they make their first public appearance, and the secret of the workshop is carefully guarded. Make it an object, however, and the detective will do it, and the reward should be sufficient to keep a number of the best of these shadows always on the look-out. Within a few lays the banks have become a little startled by finding a sprinkling of these pieces inside their vaults, and public attention is likely to be aroused to a serious effort to abate the nuisance. We cannot doubt the hearty co-operation of the Government in a matter of such importance.

I have the honor to au, with preats despert Same Rop Chouder, derton of the Ment. Hen Howels Cobb. Beasury Washington City

loopy Office of the Assistant Treasurer of U.S. Now York - Suly 12. 1860 the receipt of your letter, of the oth without, one the subject of re-coining the "Gold Dollar" of the first issue. That the comage of gold dollars had, very far, exceeded the wants of the public, is a fact about which there can be no difference of opinion, in this city; and is, I believe, the prevailing Sentiment throughout the whole comtry: findging from the numerous letters addressed to me by bankers from mask of the principal cities of the Union, requesting me to receive their "dollars", in exchange for coins of the larger denominations. The "dollar" prices are never used in large payments, on account of the time and labor required to test and count them. It would be impossible to accomplish the enormous transactions daily necessary in gold coins, in the city, between the Banks, leashows, and Treatury, were it not for the mutual arrange ment which now exists- That all the large movement of could ohall be, so for at practicable, in the highest denomination. The lange export of gold to Europe, for several years pash, had not been con fined exclusively to Bard, but we have been

drained of nearly all our double Eagles and Eagles; these being the only two denominations deemed ad visable to ship: the smaller coins resulting in too great loss from abrasion, when recoined. This drawings is to thorough theal, for seve eral rocks, the movement of coin, in and out of their office and, also, at the Banks, has been mostly in the smaller denominations: causing great labor and inconvenience. The Gold Dollar is only needed for the purposes of change: beyond that, they are regarded at a positive muisance, and five millions would be an ample supply for the entire Union. But, according to the late report of the Director of the Minh, he had caused to be coined \$ 14.000.000, more than \$11.000.000 of which is what is termed the first comage. Of the whole amount, nearly \$ 10,000,000 is held by the Banks and other movied institutions of this city; and I have, in my would, about \$2.300,000, with a daily accumulation which cannot be avoided, at the manifest policy is to put them at rest. For this reason, when paid out they invariably find their way back tothis office, through the leastons and other sour ced: rendering it necessary to recourt and retest them - causing great annoyance and unnecessary Labor. The evil is becoming so great that it will be absolutely necessary to apply a rem

edy at an early day; and the relief to this office alove, where nearly all the money of the Bov ernment is received and disbursed, should be a sufficient inducement. The Mich has, at this time, so little employment, that probably no additional force would be required to provide for it, now: and it would, in my fudgment, he a wite measure to recall the first issue of these coins, and recoin them into such of the larger denominations at the owners may desire. The labor of separating the two issues would be consider erable to the holders, but would be readily incurred, in view of the benefit, to be derived for the re-coinage. If all came in - which is not at all probable - it would leave in circulation over \$ 6.000.000, or more than sufficient for the purpose originally inhended in their commune. The expuse incurred by the Som ernment is of trifling importance compared to the benefit gon would confer apon the but niess interests of the whole country.

I undershand the sentiment of New York upon this subject : and speak advisedly when I say that such a meadure would be most highly appreciated, and dearnestly hope that a careful examinar tion of this subject will widere you to take the necessary steps to have it effected.

I am Sin Cour obt. Seroaux . John J. Coisco addishan headern Hou Howell Coble Seastan of the Ireasure Washington Delos

Comptroller's Office.

July 12: 1860. Hou: Ja! Ross Snowden, Director of the Mint. Philadelphia. Ja. Sir, In a communication addressed by Hon: Chat. R. Buckalew, U. S. Minister to Ecuador, to the 5th chuditor of the Greasury, under date of 23. March, 1859, he remarks, as follows:-" I now send by Mail to Mr. Inowden, specimens of the various silver coins constituting the currency here, for assay, and have to request that you call upon him for an afficial report as to their values. Such report, so far as this Office is advised, has never been requested of you by the 5. Auditor. To enable me, therefore, to adjust the accounts of Mr. Buckalow understandingly, and properly, will you have the Kindness to inform me of the result of the assay of the Coins referred to? The educator, in his statement of the accounts of M. B. has estimated the Ecuatorian currency at 74 100 cls, as compared with the gold coinage of the U. S, while the Minester Comparted it, at yo cents. Very respect fully.

Your Obot. Feirt.

Elice Courier's Office. July 2 no 1860

Hon be I Ross Snowden

Director-

I submit-herewith the usual monthly Teturn of absence laterness and overtime of workmen in this depart. :ment- Thave to report that the new boilers are now ready for pulting up; the bricks required for the work will be delivered as soon as desired, and the masons are prepared whenever called upon to go to work. It will be necessary however to give Mes = I.P. Morris x6: the boiler builders and Mr. For the mason a few days notice of the time when we desire the work commenced. The For asks to be allowed to draw from week to week during the work a sufficient sum to pay the wages of his workmen say \$ 150 to \$175 per week. We have to day received the last delivery of Gold and Silver Ingots until the Settlement of the accounts of the Melter & Refiner. These Ingots will be worked dwingthis week and the coin from them delivered to the Treasurer. Thave also to mention that two of the boilers have given out; but in view of the early replacement-of all the old with newborlers the Engineer has deemed it unnecessary to have them repaired Respon George Chief Chief Comer

for the mouth of

Inne 1860

19 Tremont St, Boston, July 7, 1860 A Snowden, Egg. Dear Sir. Having been the recepient of favors from you heretofore, thaving bought comes from the mint repeatedly, through your Kindness. I now beg to hand a comple of coins-Washington pieces - for your examination, hoping they may be of sufficient interest to add to your cobinet. They are, especially the larger one, considered very rare of have commanded a large price when one could be procured, but my object, Sir- Iwould frankly state - is to procure one of your large Washington medals I trust these may be considered north exchanging. I am very much in-Crested in our comage. Those a voluable collection of our mint series, + accessional pieces, I have spent much

time & pains to perfect them, theep them in fine order for examination. need not say I have expended a good ded of money on mycollection, es-pecially my Washington pieces. have done what I could to promote a study Hove for these things as works of historical interest + works of art, & was one of the founders of our Numismatie Society. For will please excuse these personal references, as they seemed necessary to the proper understanding of the greetrow, whether I am a proper person to receive one of your splendid medals. I want the medal in silver & brouze, of possible, twill glodly pay the volue of silver & cost of striking rang other charges in cash, beside feeling under great obligations for the foror. I evould also ask if it be consistent with your plan, to send me one of your

Cotologue, or description of the mint collection with your autograph on fly leaf. Begging fordon if I have tresspossed too much in thus addressing you. I am, Deardirmost Respectfully your oft. Serve. A. Wiggin duly \$6,1860, Sent Though Edme Modul -. Moerons muse manyery Comel Lunosel Brand 2/16

dy atten by an herring the reasonable charge be transporting old copper cents from the herr fiche Partoffin med carrying back cents of the new coinage of the same amount, on the grounds stated in gran letter.

desired doubt the enterious and profinity
of making this arrangement general, in regard
to the principal pertoffices in the United States as I
am not arrane that any complaints have arisen
in regard to the reperaturation of all courts in
circulation as in the case in hurgers. As the
copuers of bringing the old courts to the mint will be
uncreased by the distance of the Part offices, and much a
general rule might lead to almose, it will be best furluspes be best to deal with much case, as they were, be
tweeters for consideration.

CLEVER COUNTERFEITING Mint of the United States,

Hon. c. R. Snowden de de

Dear Sir,

We think it proper to bring to your notice in a somewhat official way, what may be considered as the consummation of the art of counterfeiting coin.

It is in the main, the revival of a species of fraud which was carried on to a limited extent, more than teventy five years ago, by artisans in Birmingham Congland, who chose the forty-franc piece of France for their operations. But in some respects it is a new and more perfect attainment in the Counterfeiting art, and more particularly concerns us, because of its invading our oun coinage.

The particular character of this alarming trespass whon our national currency (the only one that desures the epithet alarming, although there are many that are annoying, and productive of lass to the careless,) will appear presently. The only monder is, that a manufacture requiring so much skill and labor

masonfactions could be entered into, as a profitable Hearing of the existence of such counterfeits in New York, we addressed a request, familiarly, to our friend Dr. John Torrey, assayer of the U. S. assay Office there, to procure us a specimen. He promptly replied, in the following terms. "I procured for you to day, a fine specimen of a ten-dollar gold coin. It has the proper neight and Size, but is no doubt filled up mith platina, It was probably made by sawing through a genuine eagle, and then turning out on a lathe, or filing away, a considerable part of the gold. A disk of platina was then introduced, and a narrow hook of gold used to fill up the saw-cut. The whole was then united with silver solder, and the milling renovated. I have reason to believe there are many of these cours in circulation, the have some ounces of platina taken out of a lot of them, brought to our office. You will have difficulty in finding the seams in the piece I send you. Scarcely a bank in our city would hesitate to take it . - I haid five dollars for this piece, which is about its intrinsic value. - Now, how shall we

detect these detased pieces? - the coinage is genuine, the neight and size correct. I am able to tell them (except when the seams are manifest) only in one way, i.e. by plunging them under nitric acid. This almost immediately acts on the silver solder, producing bubbles of nitrous gas, and a green discoloration around the joint; finally separating the parts completely. A few minutes' or even seconds' immersion in the the is generally sufficient to detect the fraud. This method can of course be applied to a considerable number of pieces at once, and the had ones picked out; the good ones not being injured by the operation." Such is the whole of Dr Torrey's statement on that subject, and we need not bear testimony its value, the thought folias and walnut if his test, But our desire is to make a deliberate and thorough examination of this particular type of Counterfeiting, with a view of making it available to the public, through your direction, and ferhaps to offer some suggestions, as a sequel. It is true, that some provision was made for a general investigation of this nature, by a recent act and appropriation of Congress; but with this we do not presume to interfere. We have taken it for granted, (and have performed a good deal of labor under that assumption) Southmen !-

I have received to day Jus Com munication ay Min 14? unst. . The counterfut coin to which Jun Callo my attention is a very dangerour one, and I have to teget had you with much a deliberate and thorough examination into the hubid, as I condially concur in the settlement that those persons who are employed in making a penaine ansency ayout to do whether is in the horner to aprach by continuous of dishoners persons who are attempting to de from I the public.

August 28, 1860.

Dear Sir,

Referring to the Statue of Washington by Henden, by the direction of your State, I suppose there is on file in some of the departments, a statement on the subject showing the completion of the work and how it was effected, - especially in reference to the fact (as I believe) that Henden took a cast from the face of Washington.

If you can furnish me with the information in question or inform me where I can obtain it - I will be much obliged.

I have made a large and full collection of the Medallic Memorials of the Illustrious Pater Patriae and am about to make a publication on the subject. Perhaps the information I request from you may be valuable as bearing upon the point of the verification of the likeness of the great original.

I am very respectfully,

Your Obedient Servant,

JAMES ROSS SNOWDEN, Director.

Treamy Supertenent lug 24"1860

he reports of the Gonge the special agent appointed hurmant to law beautine the Treasing offices, rereal the fact that a new and dangerous counterfiel of an sold comage has appeared in heavyork in which platina is mbothluted futtu same neight of sold, Several hundred Adlan, of this spurious com have been ascertained, Though nery few persons are able to distinguish the sourious fran the flucine gold coire - and considerable alarm her, heen calinefred there en the mbjert.

The reports from her back and your city negert the knows bleam heen the splitting the generium coins, alstrady a large pertein 4 the sold, and replace it with Watur so perfectly that the uncrose ofe will not ober

the place of punction.

The report from Berton states that the lefristant Freas. - unes there procured two of there hurious coins franches here, and intented them to the careful examination & eaperiments of some of the most skilful morkers in gold in Bostan whose opinion man, that they mene not gennine cains split, but mene au cutine ly new Talerication.

the conneped the belief that there coins came tranthe himt of a rich man in new york who has a large capital comployed in this burnels.

I man megetted to myenge in herry of that a revand should be offered by the detection and conviction of the parties argaged in this new counterfest. But from the character of the spurious coin, so difficult to be distinguished by the public at large from the germine - the offer of a public semands mened probably increase the alarm public semands mened probably increase the alarm already stated to east, and perhaps discredit on entire gold coin age. Besides the means under the control of this department for make a purpose is catreined line ited.

Thank to day, addrifted a confidential letter to the leis co the assistant me as were at her fire arhing him botale whether. The placing a moderate une at his disposals to be privately effered through metable channels for the detection of conviction of hissons engaged in this counterfeit, would in his diminar serve any useful purpose in treating up the business.

Min letter is mitten to apprise you of the facts shaled in order that shared and, thing material in regards to their mitjut have come to you knowledge you will be bleased to come unicate it, as well as you news on the steps professed to the bis co.

I have received goin favor of fertuday. The pulge to to when it solder has been altracting our attentions for lime time hast. The Apayers of the must addroped mo and official with on the sulpt in his land, a copy of which, lythe with my haply, I herewith enclose. hemo de whole much time and attention to their important matter, and mits thatly in a few days, be broken I to make a apart when it: a copy of which I will un mediality Lund to the despartment. In the mean time it is highly desirable, in accordances with fund supportions, that the tigilance of the police thous as don in motion to descover, y populato, the forfetrature of this dangerous from . Bus this should andoublidly to done privately; as, otherwise the hubble mind and as hnematurez and unnecepant alaurned.

Mono or it is true, some alarm already manifested through the sense of sewards were offere for portions authorties. Os toon as are effecient remeally for the end can an degether and annanged, A culs as time to state at seas mapin's Ande, on the furt grounds of apprehen now for the future. On the hourt the officers of the mint one a special Commis: non, outsides of the mint, where acrius and may probably ho different, and thus the Lespantement. They are afferded a choice of ac. ? tion and of semedies. I have the honor to ao, gour faith for downant, Sames Top Induden, Non Howell Cobb, Directer of the Daint. Washroften City.

Copy . Ment of the United States: Smowden Geneter to to. We think it proper to being to your Botice in a Somewhat official way, what may be considered and the contemmention of the got of Counterfeiting acin . At is in the main, the second of a Speciel of flowed which was carried on to a limeted extent, more than twenty the your sage by atisans in Birmingham, England. who who who the hally france france for their operations. Dut in Anne respects it is a new and more horfest attainment in the counterfeeting arts and more protocolarly concerns us, because of its invaling our own Chanage . The frantiscilar character of this alarming tresposs uponous Matienal Counage (the only one that deserves the efethet alarming), welkough there are many that are annaying, and productive of both to the sauled and inefferenced) will appear presently. The only winder it, that a manufacture requiring to much thelland laby; child be intered into, as a proplable business. Assing of the existence of Such counterfiely in Ase Sich we adde feed a request familiarly to our friend De John charge the dayer of the U. S. askay Office there, to procure us a Specemen. The prempty reflied, in the following time! The procured for you to day, a fine specimen of a ten dollar gold coin. It has the proper weight and size, but it no glast poleoluch with platina. It was probably made by Lowing thungh a gonuine eight, and then turning out on a lathe for filing away, considerable hart of the gold. A disk of platina was then introduced, and a narrow hosp of gold used to fill up the Saw ait. The whole was the runited with liber Solder, and the molling renovated. I have riasen to believe there are many of these coins in on autation. He have some

ounced of platina taken out of a lot of them, brought to our office. Son dearcely a bank in our city would hesitate to take it spaid five dollar of this pice, which is about its intimise value. when that we detect these debased puces? the comage is genuine, the weight and lije corect. Sam able totele them Corceptwhen the Seams are manifest) orligin one way, i.e. by plunging them under hite acid, This almost emmediately acts on the selver Solder, producing but the of his out gas, and a green dissolution around the saint, ghally se, arating the parts completely. Ofer minutes or even seconds'emmerse in the ritio acid is generally deffaint to detect the fand. This on those can of course be applied to a considerable ownthe of precident ma and the bad oned peaked out; the good ones not being infried by the peration Such is the whole of to Dorrey's Statement in that is brot. and we need not bear tellimones to tits value. But our desire is to make a deliberate and therough examination of this particular lape of counterficting, with a view of making it available totto hublie, through your direction; and fuhaped tooffer Some day queling as a sequel. It is two, that some perisher was make for to genwas shiestigation of this nature, by a recent wot and appropriation of conqueto; but with this we do not pressure to interfere. He has always taken it for granted (and have performed a good chal &" labor under that aldumplin) that it is an incidental or bye duty of every one who is legally employed in making a genium currency for the Country, to do what is in his haver without the range of his hartroular department to defeat the machinations of those who oninenally at work in an appoint direction. We therefore with this, to have your decision, whother we shall go on to experiment and refert to you ad above indicated. Mucwith we hand you the soin in question along with Som that are quine that you mary by the experiment of making a discum. action by the wir at offehand methods. We shall indeaver to get more, but failing in this, one his will answer our funfale.

Ven fruit best hint.

NOTE.—While we take considerable pains to keep our customers advised of changes in prices of our articles, we would like it to be clearly understood that no responsibility is to attach to us when it is not done; as such variations are to be expected from time to time. Neither can we be considered bound by any quotations until return of mail, unless we agree to be so bound for a specified quantity. Our discount for cash is 5 per cent.

EXTRACT FROM ACT OF CONGRESS RELATING TO STEAM-VESSELS CARRYING FREIGHT AND PASSENGERS, PASSED AUG. 30, 1852.

"Sec. 7. And be it further enacted, That no loose hemp shall be carried on board any such vessel; nor shall baled hemp be carried on the deck or guards thereof, unless the bales are compactly pressed and well covered with bagging, or a similar fabric; nor shall gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids, or materials which ignite by friction, be carried on board any such vessel, as freight, except in cases of vitriol, camphene, or other explosive burning-fluids, or materials which ignite by friction, be carried on board as stores shall be secured in metallic vessels; and every person special license for that purpose, as hereinafter provided; and all such articles kept on board as stores shall be secured in metallic vessels; and every person who shall knowingly violate any of the provisions of this section shall pay a penalty of one hundred dollars for each offence, to be recovered by action of debt in any court of competent jurisdiction.

"Sec. 8. And be it further enacted, That hereafter all gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids, and materials which ignite by friction, when packed or put up for shipment on board of any such vessel, shall be securely packed or put up separately from

r and from all other articles, and the package, box, cask, or vessel containing the same shall be distinctly marked on the outside with the name description of the articles contained therein; and every person who shall pack or put up, or cause to be packed or put up, for shipment on board of a such vessel, any gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids or materials which ignite by friction, otherwise than as aforesaid, or shall ship the same, unless packed and marked as aforesaid, on board of any steam-vessel carrying passengers, shall be deemed guilty of a misdemeanor, and punished by a fine not exceeding one thousand dollars, or imprisonment not exceeding eighteen months, or both."

Our steamboat captains construe the above to exclude Oil of Vitriol, Nitric and Muriatic Acids, Aqua-fortis, etc., and Sulphuric Ether; and it will be observed that, even in cases of special license, each specified article must be put in a separate package.

NOTE.—While we take considerable pains to keep our customers advised of changes in prices of our articles, we would like it to be clearly understood that no responsibility is to attach to us when it is not done; as such variations are to be expected from time to time. Neither can we be considered bound by any quotations until return for each is 5 per cent. by any quotations until return of mail, unless we agree to be so bound for a specified quantity. Our discount for cash is 5 per cent.

EXTRACT FROM ACT OF CONGRESS RELATING TO STEAM-VESSELS CARRYING FREIGHT AND PASSENGERS, PASSED AUG. 30, 1852. "SEC. 7. And be it further enacted, That no loose hemp shall be carried on board any such vessel; nor shall gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids, or materials which ignite by friction, be carried on board any such vessel, as freight, except in cases of special license for that were applicable to the secured in metallic vessels; and every person special license for that purpose, as hereinafter provided; and all such articles kept on board as stores shall be secured in metallic vessels; and every person who shall knowingly right. who shall knowingly violate any of the provisions of this section shall pay a penalty of one hundred dollars for each offence, to be recovered by action of debt in any court of account of

"Sec. 8. And be it further enacted, That hereafter all gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids, and research that hereafter all gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids, and which ignite by the securely packed or put up separately from the property of the secure of t debt in any court of competent jurisdiction. materials which ignite by friction, when packed or put up for shipment on board of any such vessel, shall be securely packed or put up separately from each other and from all other articles, and the package, box, cask, or vessel containing the same shall be distinctly marked on the outside with the name or description of the articles contained therein; and every person who shall pack or put up, or cause to be packed or put up, for shipment on board of any such vessel, any gunpowder, oil of turpentine, oil of vitriol, camphene, or other explosive burning-fluids or materials which ignite by friction, otherwise than as aforesaid, or shall ship the same, unless packed and marked as aforesaid, on board of any steam-vessel carrying passengers, shall be deemed guilty of a misdemeanor, and punished by a fine not exceeding one thousand dollars, or imprisonment not exceeding eighteen months, or both."

Our steamboat captains construe the above to exclude Oil of Vitriol, Nitric and Muriatic Acids, Aqua-fortis, etc., and Sulphuric Ether; and it will be observed that, even in cases of special license, each specified article must be put in a separate package.

TREASURY DEPARTMENT.

Register's Office, August 104, 1860.

Sir:

I have the honor to request that the usual estimates for the fiscal year ending June 30, 1862, may be prepared at your office, and transmitted to this, as early as convenient, for the purpose of being laid by the Secretary of the Treasury before Congress at the ensuing session. I would invite your particular attention to the 14th section of the act of August 26, 1842, to the 2d section of the act of 17th. of June, 1844, to the joint resolution of 7th January, 1846, relating to estimates to be laid before Congress, and 8th section of the act of 3d March, 1855, and 2 Section of the act of June 2,1858, Laws U. S. page 308

You are requested to send the estimates on foolscap paper, with MARGINS OF AT LEAST ONE INCH IN WIDTH, that the same may be bound in volumes in this office, in the four inclicated on a subsequent frege

In the references to the acts authorizing the expenditures of the sums estimated for, you are respectfully requested to refer to Little and Brown's edition of the Laws of the United States.

I have the honor to be,

Your obedient servant,

last Jours

James R. Showden Equire Sirector of the Miladelphia

305 East Truth St. New York, august 1860 -Dear Fir: Stake the liberty of Lending to you herewith, a Ran and Prospectus of a "Collection of Rase and Original Documents and Relations concerning the Descevery and Conquest of America, Cliefly from the Thanish archives. Sumber one of this Collection is now ready for delivery, in accordance with the terms of the rospectus. The task of getting together the documents for this Collection and of preparing them for this press, I need not say, has been Essentially a "Caben of love, and of individual gratification. The printing of them for the instruction of students and the Eatis faction of the curious much however, be a matter of considerable sisk; but this I am willing to undertake, if I can Secure, among gentlemen interested in tracing liminican History and Ethnography to its source, a sufficient number of subscribers to the Series to kay the cost of paker and printing. This well require about 150 Subscribers. I do not propose to bring out more than one or tuo tos. a year, ranging in price from \$1 4 \$3, ac= Cording to their size and the cost of the necessary maps and illustratures, Due adrice of the dates of their appearance and cet will be given to Lub: Scribers. - asking your prompt and favorable con: Sideration of the bean and bookertus, I am, Dran Sir, Jour Oct. Servant, V. Lev. Filler

From E. S. Squirer Eg Hour rare document in relation to the discovery teorquest of America. August 1860.

Pennsylvania. ((Trecutine Chamber)) Harrisburg, Pa. Aug. 29 1860. Son ; Las. Kop Inowder: My Dear Sir: - After returning to you my grateful acknowledgments for your Kind attentions during my recent to ask at your hands. I am exceedingly desirons to add to any cabinet of coing, a few specimens which I find it impossible to procure except at the mint, among which are the following:-2 cent piece 1836, in nickel & coffee. King Cent 1850, several varieties. 1851 Cent in mickel & copper. 1853 Pattern Cent. 1854 Filying Eagle " No. Stars 1855 Alying Eagle, several varieties. 1856 Niekel. 1858 do 12 in a set. 1859 Pattern Half dollars, in copper. I have Nalf cents for 1840-41-42-43-44-45-46 47-48 and 1852. Specimens for patterns only

of the foregoing were structs, and as most of them are exceedingly interesting, I would esteem it an invaluable favor, of you can by any proprihility, Junish me with a Thereinen of each. Of course I uplet to pay for them their full value - and of in any thing I can serve you call on me with the greatest freedown. If I Were a Com dealer or a speculator in rare com, I would not ask for this foron, but as I desire to place the specimens of ask in a valorable collectron which has occupied my attention for years, & which is interesting to the entire commune mit, I feel privileged to make Russon to you any wants. your mit medal of Mashe kington, you were Kind enough to say you would send to me. mitth all I have named, do not for that reason decline sending any.

With sentiments of since regard, your friend Min F. Packer
